

## McGOWN BILL SOON TO BE ENFORCED IN EL PASO

County Commissioners Extend School District at Sierra Blanco.

The county will soon take action relative to the new McGown poor farm bill, which removes the obligation of the county to care for patients who have not resided in the city six months and in the county seven months. County health officer Hugh S. White inquired of the county commissioners this morning if he should take immediate action, but Judge Elyar stated that he would confer with mayor C. E. Kelly before any action is taken.

However, the new law will mean that the care of the short time residents will devolve upon the city or the charity organizations of the city. County auditor J. A. Escudé said that during the present month the county has expended \$115.50 for the transportation of indigent consumptives.

**Salary Cut Considered.**  
The commissioners also discussed the matter of decreasing the cost of maintenance at the county hospital. At present Dr. Geo. H. Carter, the head nurse in charge there, receives \$80 a month, house rent and food for his family. The commissioners want to cut the salary down to \$60 and compel him to board with patients at the hospital, but this he declines to do. No definite action was taken in the matter.

County clerk Park W. Pittman was authorized to issue a warrant in favor of county surveyor J. W. Eubank for work on the county road at Sierra Blanca as soon as the bills for this work are approved.

It was also authorized to draw a warrant for \$7000 to pay the interest and exchange on bonds and it was decided to take up one of the old \$1000 funded indebtedness bonds.

**School District Extended.**  
The school district of Sierra Blanca was extended six miles northwest to Fort Hancock.

It was decided to continue to furnish tobacco to patients at the poor farm. The cost of this item is about \$18 per month.

Commissioner J. Perez reported that smallpox in the lower valley is subsiding, but there are still six convalescent patients in the hospital at San Elizario, and this building cannot be done away with yet.

Golding, Mills & Julian were awarded the contract for the painting of the courthouse roof, their bid of \$123 for the job being the lowest of three. The other bidders were M. R. Robinson, \$125, and E. S. Cummings, \$205. But \$150 was set aside for the purpose and only the roof of the old building is to be treated with two coats of a waterproof paint.

The commissioners visited the county jail and the county clinic at noon. They found the jail clean and sanitary, and the clinic is conducted on the most modern lines.

### THE WEATHER.

**Forecast.**  
Tuesday, March 28, 1911: El Paso and vicinity: Fair tonight and Wednesday; cooler Wednesday.  
New Mexico: Fair tonight and Wednesday; not much change in temperature.  
West Texas: Tonight fair, warmer in southeast portion; cooler in the Panhandle; Wednesday fair, cooler except in southeast portion.

**EDITOR BROWNE**  
Of the Rockford Morning Star.

"About seven years ago I ceased drinking coffee to give your Postum a trial.

"I had suffered acutely from various forms of indigestion and my stomach had become so disordered as to repel almost every sort of substantial food. My general health was bad. At close intervals I would suffer severe attacks which confined me in bed for a week or more. Soon after changing from coffee to Postum the indigestion abated, and in a short time ceased entirely. I have continued the daily use of your excellent Food Drink and assure you most cordially that I am indebted to you for the relief it has brought me.

"Wishing you a continued success, I am, yours very truly,  
J. Stanley Browne,  
Managing Editor."

Of course, when a man's health shows he can stand coffee without trouble, let him drink it, but most highly organized brain-workers simply cannot.

The drugs natural to the coffee berry, affect the stomach and other organs and thence to the complex nervous system, throwing it out of balance and producing disorders in various parts of the body. Keep up this daily poisoning and serious disease generally supervenes. So when man or woman finds that coffee is a smooth but deadly enemy and health is of any value at all, there is but one road—quit.

It is easy to find out if coffee be the cause of the troubles, for if left off 10 days and Postum be used in its place and the sick and diseased conditions begin to disappear, the proof is unanswerable.

Postum is not good if made by short boiling. It must be boiled full 15 minutes after boiling begins, when the crisp flavor and the food elements are brought out of the grains and the beverage is ready to fulfill its mission of pleasant comfort and renewing the mind and nerve centers broken down by coffee.

"There's a Reason."

### CONQUERING FIRE WITHOUT EXPENSE

Enough Copper Extracted From Water to Pay for Fire Fighting.

Bisbee, Ariz., March 28.—Excellent progress is being made in putting out the fire at the Lowell shaft of the Copper Queen company. Water is being flooded into the old gobs which have been blazing between the 1100 and 1300 levels with good effect. The water which flows out of the 1300 level is highly impregnated with copper. This is being precipitated over old tin cans and scrap iron, depositing rich copper ore. The ore deposited in the way will more than pay for the fire fight.

At the Holbrook shaft of the same company, where a fire raged for several months, the bulkheads which separated the burning drifts from the rest of the mine have been taken down, the fire having been entirely conquered. Water was used here also. Sinking at the Lowell has reached the 1600 level and a station is now being cut. Drifting will be started soon to connect with the 1500 and 1600 levels of the Sacramento.

April 1 will witness the start upon sinking the new shaft for the Copper Queen company, between the Lowell and South Bisbee properties. It will be known as the Dallas. The wagon road to the new site had been completed as has the air line. The drills and hoist will be operated by compressed air.

### CHIHUAHUA MINES WORK GOOD FORCES

The Paricionera, in the Santa Eulalia cañon, Chihuahua, Mexico, which Bert Ferrar is operating, in the old Joseph Qualey property, one of the most famous of the old mines of the camp. It has, however, produced but small amounts of ore during the past few years. Shipments are now being made however and the outlook for the future is favorable. The work is down 1200 feet. There is an efficient steam plant for much deeper development and operation. At his property, as with others, there is probably a 30 day supply of coal and powder, and operations will continue until this runs out, if no additional supplies are secured, and of course he hopes no shutdown will be necessary.

The Potosi and Chihuahua is working as it has been right along under Supt. A. L. Eaton and W. A. J. Quigley, general agent. At this mine 700 men are employed. The railroad of this company is operating constantly and without trouble.

The Mina Vieja as well as all the "trust" properties in working order are installing a new electric plant, and

gas producer. W. J. Mitchell is superintendent and the output is about normal.

The London Exploration company took over the Bonito Terre some time ago. A. W. Raymond, manager of the El Oro Mining and Railway company of El Oro, Mexico, is manager of this property. There is a steam plant. Since the new company took hold of it the mine has developed very satisfactorily.

The San Toy of which Donald Gillies is manager is operating. The gas producer is working satisfactorily. The New Central shaft is down 1200 feet.

### ESPERANZA REPORT SHOWS GOOD PROFIT

The report of the consulting engineer of the Esperanza Mining company of El Oro camp tributary to Mexico City shows estimated ore reserves on December 31 last of 367,353 dry metric tons (1 metric ton—2204 lbs.). It is estimated that these reserves will return a profit of \$1,408,618. The estimated profit from the retreatment of the tailings dump is \$503,851, making a total of \$2,012,479. In January the mills of the Dos Estrellas company handled 37,415 tons of ore, and high grade ore to the amount of 16,073 kilograms was shipped to the smelter. The total return in the month was \$68,349.81 pesos and the total expenses \$39,369.43 pesos, leaving a profit of \$28,980.38 pesos. In the month 4700 pesos were spent in permanent improvements.

The Consolidated Mines of El Oro, Ltd., have been formed to take over and develop some of the holdings of the Carmen mines of El Oro, Ltd. The capital is principally French. The properties acquired are the Motezuma and a part of the Pleyades. Fire in the Somera property of the El Oro Mining and Railway company has been extinguished without material damage to any of the levels.

### PREPARE TO RESUME WORK ON MINES NEAR TUCSON, ARIZ.

C. R. Rhinehart of New York, largely interested in the Mowry and Alto mines in the Patagonia district south of Tucson, Ariz., is now on the ground arranging for the resumption of work on a large scale.

The Elephant Head Buttes Mining company, under the management of ex-United States marshal Daniels, is considering plans for a concentrating and separating plant for its property in the Santa Rita, 35 miles south of Tucson. The main ore body is 40 feet

wide and carries gold and silver values besides copper, lead, zinc—the base metals being all in a sulphide form. Average samples give assay values of \$15 per ton, and tests prove the ore to give good results by extra wet or dry concentration.

**NEW METAL IS NEAR APPROACH TO GOLD**  
Cupror, a new metal, the nearest approach to gold known, is characterized by the following qualities. Its color is that of 18 carat gold. It polishes readily and acquires a brilliancy of luster higher than that of any other metal. This luster is permanent, as the metal is non-corrodible and will not oxidize. Not only is it immune from ordinary atmospheric influences but also from the attacks of salt water and salt air. The most potent acids have less effect upon cupror than upon any other base metal. Nitric acid affects it the same as low grade gold. The close grain of cupror is one of its most remarkable features. The microscope shows a texture exactly like that of gold.

**NOTICE TO TAXPAYERS.**  
AFTER MARCH 31ST CITY TAXES WILL BECOME DELINQUENT AND A PENALTY OF 10 PERCENT WILL BE ADDED.

THE OFFICE WILL BE OPEN UNTIL 2 P. M. FROM MARCH 27TH TO MARCH 31ST INCLUSIVE TO ACCOMMODATE THOSE WHO CANNOT COME IN DURING THE DAY.

Liquid Porcelain Lined Automatic Refrigerators Now Ready

**\$1 Per Week Buys Any Refrigerator**

Admirably fill a long felt want for a perfect refrigerator with snow white porcelain chambers. Liquid porcelain was discovered by a noted chemist who further discovered that by coating metal with it and baking it for hours at a high temperature the metal and liquid porcelain were practically annealed. This annealing, or baking, process is done by us in large ovens specially built for the purpose. It makes the liquid porcelain really a part of the metal base, therefore it will not crack nor scale and makes an absolutely white, sanitary, lasting and decidedly good looking lining. Liquid porcelain is made especially for the manufacturers of the great Automatic and the successful method of applying it to metal is a secret with them.

### Gunn Sectional Bookcases

are made from selected high grade materials. Doors, Drawers, and all other parts open easily and will not bind or stick. If you have books, you need a bookcase, and you cannot find prettier, or more convenient, or more durable cases than the ones we are showing.

### MAIL ORDERS

We fill all mail orders the day received on any of these specials at these bargain prices.

### FINDS GOLD NUGGETS IN SHAFT NEAR TUCUMCARI, N. M.

James Hibbets of Grady, in the Tucumcari region, New Mexico, reports that gold nuggets of small size are being taken from a shaft 50 feet deep which he is sinking. Several small finds of various minerals have been made in the eastern and southern portion of the county, and the residents are hopeful of some day making a valuable discovery.

### LET'S CONTRACT FOR TUNNEL.

The Copper Queen company has let a very large contract on its property

"Our baby cries for Chamberlain's Cough Remedy," writes Mrs. T. B. Kendrick, Rasaca, Ga. "It is the best cough remedy on the market for coughs, colds and croup." For sale by all dealers.

on the Agua Fria, five miles from Mayer, Ariz., consisting of a 1000 foot tunnel and other development work. This will be a perfect system of exploitation of the many claims and when completed will give the greatest depth ever attained. W. J. Deam has secured the work and will begin operations immediately.

### DENVER GIRL FILES SUIT AGAINST SIERRA BLANCA MAN

Pretty Nurse Loves Position, She Says, Because Patient Reported She Was Incompetent and of Bad Character.

Miss Laura Joy Lowry, a trained nurse, 22 years old, according to the Denver Post, has filed suit in the Denver district court against J. B. McCluskey, a Texan, asking damages in the sum of \$15,000 for defamation of character, the loss of her position at the Phipps sanitarium, where, for 30 days, he was under her care.

"You see, I was getting along so well in my work," she said, "I had been at the Phipps for five months, and three months of that time Mr. McCluskey was under my care. He cannot say one thing about me that reflects on my character or my work and tell the truth. I took care of him as I would take care of any other patient. He was a stranger here and I went places with him. He left the sanitarium and went to the Kaiserhof hotel. Then, on the night of March 6, a few days later, I was summoned to the office of the superintendent, and told that I could no longer retain my position there because of statements concerning me which had been made to him by Mr. McCluskey." The Post says:

"McCluskey is in the wholesale shoe business in Sierra Blanca, Tex. Since coming to the Phipps sanitarium with his brother, both in search of health, he has displayed money and diamonds to considerable extent, kept his au-

tomobile at the sanitarium, and given every indication of the man of wealth." R. G. Dun does not show any such man in business in Sierra Blanca.

### NEW FLAG NOW FLOATS IN SAN JACINTO PLAZA

A new flag was unfurled from the steel mast in San Jacinto plaza Tuesday morning. The old flag had grown rusty with the smoke and grime of winter and a new one was run up in its place by the caretaker.

In the United States army and on the government buildings, on the battleships and every other place where the American flag is, it is furled each evening and unfurled again next morning. This is in respect to the national colors and is in keeping with the custom the world over. The one in the plaza is allowed to remain at the top of the mast from the time it is first run up until it is replaced with a new one.

This not only shortens the life of the flag, but destroys much of the sentiment, army officers say, as it is considered disrespectful to the national colors to leave them out in any kind of weather and at night.

For soreness of the muscles whether induced by violent exercise or injury, Chamberlain's Liniment is excellent. This liniment is also highly esteemed for the relief it affords in cases of rheumatism. Sold by all dealers.
